## SP500 Series

### Highly Sophisticated, Entry Level Receipt Print

- [Download documents](#)
- [Email a sales person](#)

The SP500 Series is a highly sophisticated entry level product range. It is capable of an incredibly fast output printing 40 columns at 4 lines per second, or racing the 58mm paper at 7.5 lines per second. This printer series has a bi-directional, logic seeking mechanism resulting in exceptional throughput outpacing its nearest competitor. The compact footprint of just 163mm by 140mm is further enhanced by its internal power supply - no "brick on top" for this printer. This efficiency is further shown in the effective cable management system allowing the internal and internal power supply cables to be neatly tucked behind a protective cove. With safety in mind, Star has included internal guttering and a liquid repellent cover.

Other features include a near end paper sensor, optic rewind option and a highlighting text facility.

#### Series Product Range

SP512 - Tear Bar Printer

SP542 - Autocutter Printer

- High speed (up to 7.5lps), logic seeking, 9-pin ql

matrix printer

- Competitively priced with unmatched price / performance ratio
